SCIENTIFIC EXCELLENCE DIPLOMAS

AUTHORS · REVIEWERS

Comunicar

The Editorial Board of the Scientific Journal 'Comunicar', in recognition of the academic quality of its wide community of researchers from all over the world, including readers, authors and scientific reviewers from the five continents, officially establishes yearly **Diplomas of Scientific Excellence** for **Reviewers** and **Authors**.

This annual recognition highlights and acknowledges the quality and visibility of Authors' work in terms of their scientific impact, measured in the computable JIF-2021 using internationally recognized metrics (WoS, Scopus and Google Scholar), as well as their presence in alternative metrics and scientific social networks.

Likewise, this distinction values the constancy and quantity of evaluated manuscripts in reviewers, as well as their personal contribution to the improvement of scientific production in a blind and anonymous manner.

In active indexations in 2022, Comunicar is top worldwide: 2nd in the world in SCOPUS and 10th in the world in JCR (top 1% and 7% in the world; percentile 99% and 93%). In JCR-JIF it is Q1 in Education, in Communication and in Cultural Studies (1st in Spanish). In SJR is Q1 in Education, Communication and Cultural Studies (1st Spanish in all three areas). It is 1st in FECYT Metrics; 1st in DIALNET METRICS. In GOOGLE SCHOLAR METRICS is the 3rd journal indexed in Spanish in all areas; 2nd in REDIB (out of 1,199 journals).
